---

## SKILLS // FRAMEWORKS

- Proficient in **HTML5, CSS3, SASS, BOOTSTRAP, CSS3 Animations**
- Other technical skills: **Git, GitHub, Firebase, REST, NPM**
- **Responsive / Adaptive** Front End code design with aesthetic features
- Experience **troubleshooting** issues with websites with industry practices in mind
- Programming Languages – Modern **JavaScript ES6 // JSON // MVC**
  - Frameworks: **React.js > Redux, Hooks, Async / Await, API Fetch, AXIOS**

## MY PROJECTS

- **GMDB** (IMBD for Video Games) - <https://frontalbert.github.io/GMDB/>
  - **Built using: (REACT.JS / REDUX / API)**
  - Fetch the latest game titles using a fetch API and AXIOS call
  - Redux – Reducer's implementation
  - Sort games by platform, review scores and franchise titles
  - Fully Responsive and backed with React framer motion and styled components
- **Music Player** (Just a MP3 Player) - <https://frontalbert.github.io/Music-deploy/>
  - **Built using: (REACT.JS / SASS/ CSS)**
  - Simple React web application that plays MP3 files with their respective cover art images
  - Self-built API – Back End like structure – songs and images are retrieved within the app
  - Responsive buttons and design – used framer motion and styled components
- **Pexels by Albert** (Image Fetching App) - <https://frontalbert.github.io/Wallpapers/>
  - **Built using: (JAVASCRIPT / CSS3/ HTML5/ API)**
  - Image dump application built off React – search and filter for images you want
  - API fetch from PEXELS API request / Async/ Await properties
  - Responsive Design and downloadable images retrieving
- **Runify** (Tracking App for Running) - <https://frontalbert.github.io/runify/>
  - **Built using: (JAVASCRIPT / CSS3/ HTML5/ API)**
  - Tracking App for exercising based off location with tracking in steps and pace
  - Leaflet API for geolocation calls and precise grid outline.
  - Use of REST APIs, Async/Await with responsive design in mind for mobile
- **Color Palette** (Color Palette App) - <https://frontalbert.github.io/ColorPallet/>
  - **Built using: (JAVASCRIPT / CSS3/ HTML5)**
  - Allows users to create their own color palettes, ideal for those planning their own projects
  - Allow users to use Local Storage to save color pallets, and export options
- **React Site** (React Portfolio Template) - <https://front-albert-react-app.netlify.app/>
  - **Built using: (REACT.JS)**
  - Portfolio website built off React with routing, switches
  - Adaptive styling off styled-components and react frameworks such as framer-motion

---

## EDUCATION

- **Juno College of Technology**, Web Development Immersive, August 2020 - January 2021, Toronto ON React.JS, JavaScript. CSS3, HTML5
- **Bachelor of Commerce**, Business Management, Ryerson University, Sept 2013 – Apr 2018, Toronto ON
